

Adopting a koala is Essential 😊😊

Koalas are so important. They are amazingly cute and cuddly and that's why I wrote this text. Koalas need saving! They are endangered and one of the best animals Australia has to offer. Do you want koalas to disappear forever? Do you want Koalas never to be seen again?

Koalas really are amazing. Whenever you think of native animal's koalas are the first animal that comes to your mind. They are unforgettable!!!!

Koalas are native to Australia. That means they aren't found anywhere else in the world. That also means that if we keep chucking rubbish on the ground and keep cutting the eucalyptus trees down they will become extinct!!!!!!!!

Koalas are a HUGE part of tourism and tourism makes lots of money. Lots of people pay thousands of dollars to see koalas and I think we should give them way more respect.

Some people might think koalas sleep too much or there are already so many Australian animals but really, if you think about it it's worth adopting a koala.

So honestly I think it's worth adopting a koala or donating some money. I hope this text inspired you to help koalas and stop their extinction.
