

Anzac Terrace P.S.

Room 11

Dear Mr. Blackwood,

I believe that we should plant more trees around the school.

Firstly trees can provide shade for people with no hat and can stop people from getting a sunburn.

Secondly we are losing trees all around the world and if we planted some birds would have a place to stay if their other homes have been destroyed.

Thirdly trees provide oxygen which helps us breathe and trees are

good for the environment.

I think its clear to see that we need to plant more trees because it provides shade, gives oxygen, it's good for the environment and gives birds a place to live.

Yours sincerely,
Millicent Baker.
